

THEMA 1

1. Open the files: **Natos.jpg**, **CD.jpg** and **Triuba.jpg**.

Natos.jpg

CD.jpg

Triuba.jpg

2. Use **ELLIPTICAL MARQUEE** , or **MAGNETIC LASSO TOOL**  tool to select the CD disk.

3. Use **COPY PASTE** or tool **MOVE**  to move the CD disk to **Natos.jpg** file.

4. To change size of disk - use command **EDIT - FREE TRANSFORM**. (Layer with a CD must be active).
Make CD - 75% smaller.
5. Then rotate CD - 30° CW (**EDIT-FREE TRANSFORM**).

6. Go to file **Triuba.jpg**.

You need to select a trumpet.

The instrument has a complicated form. So we can select a background:

Use **MAGIC WAND** tool and select a white background. To select all white color in a photo:

The parameter **COTIGUOUS** in **OPTION BAR** must be switched off.

7. Then go to **SELECT - INVERSE**: the trumpet will be selected.

8. Move the trumpet to file **Natos.jpg**.

Now you can close files Triuba.jpg and CD.jpg - you will not need them anymore.

9. In a file **Natos.psd** you have 3 layers: **Background**, **Layer1** and **Layer2**.

You can Rename the Layers: **CD**, **Triuba**, **Natos**.

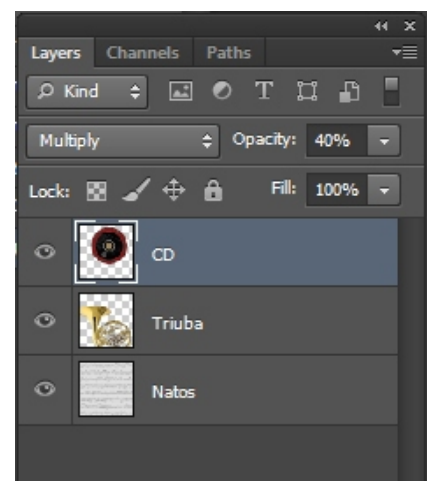

10. To change order of Layers you need to drag the Layers with a **MOVE** tool.

11. Make active Layer with a CD.

12. In a **Layers PALETTE** you can change the **OPACITY**.

Change it from 100% to 40%. CD disk becomes transparent.

13. Change **MODE Normal** to **MULTIPLY** (in a Layers palette).

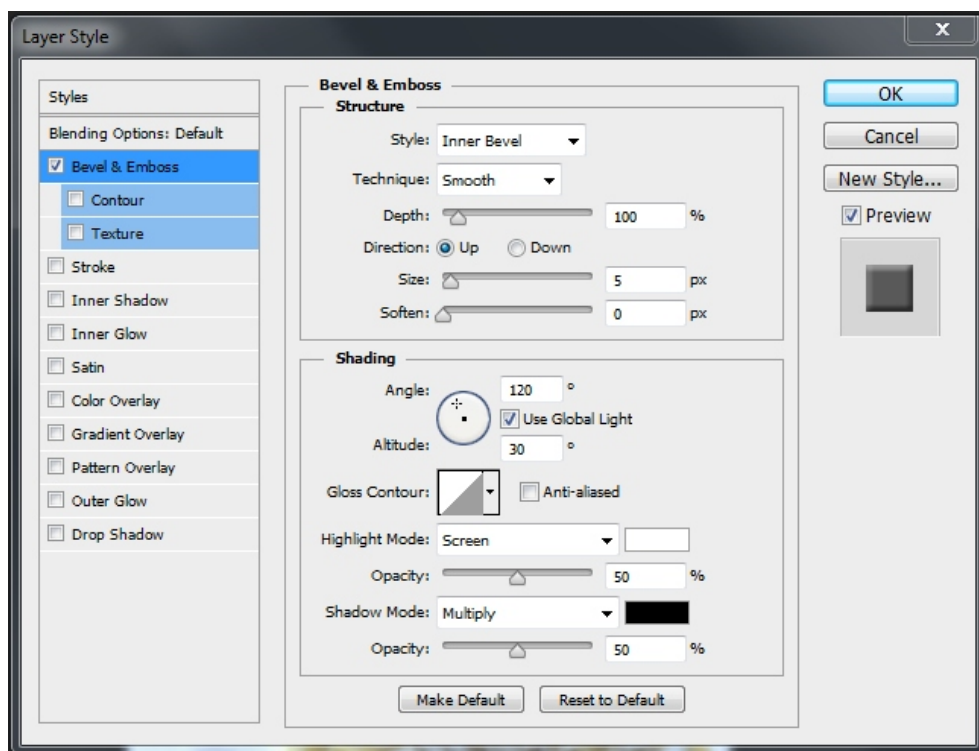

14. Enter the Notes: Select the **CUSTOM SHAPE TOOL** tool, select the theme - MUSIC, select the note you want, and drag the left mouse button to the drawing. The color of the note figure will be the same as the chosen color for the **FOREGROUND COLOR**.

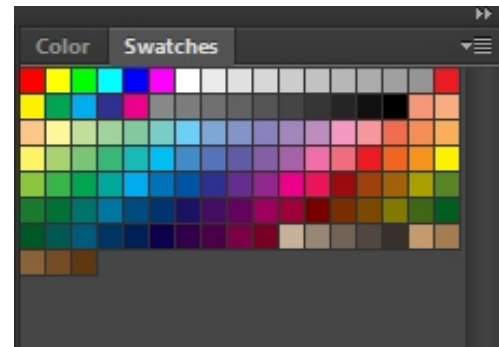

15. Use **TYPE tool** and write a text "MEZZO PIANO". In **OPTIONS BAR** open **TOGGLER THE CHARACTER AND PARAGRAPH PANELS**. There you can change the settings of the text. Change **SET THE LEADING 30**. Size - **36 pt**.

16. Automatically will be created a new layer for the text. You can change a style of the Layer. Go to **LAYER - LAYER STYLE - DROP SHADOW**. Change some settings: **OPACITY - 60, ANGLE - 150**.

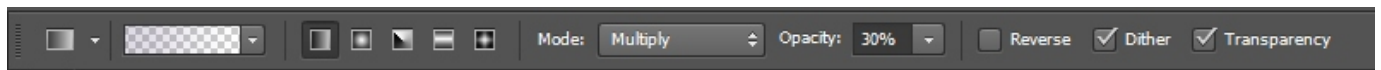

17. To make text as relief go to **LAYER - LAYER STYLE - BEVEL AND EMBOSS**. Change settings: **HIGHLIGHT and SHADOWS** set **OPACITY - 50, STYLE - INNER BEVEL**.

18. The last step create Gradient effect. To do this, open the **SWACHES** color selection palette (from the **MENU - WINDOWS**). Choose a violet color.

19. First - create the new Layer for Gradient, then - choose blue color for Foreground. Then take **GRADIENT** tool (LINEAR). Set the parameters: From **FOREGROUND to TRANSPARENT**, **OPACITY - 30%**, color mode: **MULTIPLY**.

20. Then drag with a mouse from top - left corner to right - bottom corner of the picture. You did!
